Use Case Specification

USE CASE – ARB01			
Use Case No.	ARB01	Use Case Version	1.0
Use Case Name	Create staff account		
Author	Pham Nguyen Bich Hien		
Date	31/05/2014	Priority	High
Actor: <ul style="list-style-type: none"> - Administrator. Summary: <ul style="list-style-type: none"> - This use case allows Administrator to create new staff. Goal: <ul style="list-style-type: none"> - Add new staff to system. Triggers:			

- Administrator want to add more staffs to manage books.

Preconditions:

- Login to system with role Administrator.

Post Conditions:

- **Success:** New staff will be created in database.
- **Fail:** No staffs will be created. Show error message.

Main Success Scenario:

Step	Actor Action	System Response
1	User choose “Tạo nhân viên” function	Navigate to administrator page which contains: <ul style="list-style-type: none"> - Tên đăng nhập: textbox, min length: 6, max length: 30, required. - Vai trò: drop-down list, raw source: “Người quản trị”, “Nhân viên” và “Người dùng”, default value: “Nhân viên”, required. - Tên đầy đủ: textbox, min length: 6, max length: 50, required - Email: textbox, min length: 6, max length: 50, regular expression: “^{^[_A-Za-z0-9-\\+](\\.[_A-Za-z0-9-\\+])*@[A-Za-z0-9-\\+](\\.[A-Za-z0-9-\\+](\\.[A-Za-z]{2,})\$}”, required - Tạo tài khoản: button. - Xóa trắng: button.
2	Administrator fills data to the form.	
3	Administrator clicks “Tạo nhân viên” button. [Alternative 1], [Exception 1, 2, 3, 4, 6, 7]	Insert new user account to the database and redirect to administrator page.

Alternative Scenario:

No	Actor Action	System Response
1	Administrator clicks “Xóa trắng button”.	Clear all input data.

Exceptions:

No	Actor Action	System Response
1	Length of username is not in range.	Show error message: “Độ dài username phải từ 6-30 ký tự!”
4	Role is not specified.	Show error message: “Phải phân quyền cho user!”
5	Email is not match regular expression	Show error message: “Email phải có dạng abc@example.com!”

6	Length of fullname is not in range.	Show error message: “Độ dài tên đầy đủ phải từ 6-50 ký tự!”
7	Username’s existed already.	Show error message: “Trùng tên đăng nhập! Vui lòng chọn tên khác!”

Relationships: Manage user account.

Business Rules:

- Each created account must be in active state when insert to database.
- Password is generated by system.
- Password is sent to staff email automatically.
- Staff must change password when they login system for the first time.

1.2.2.2 <System> Notify reading schedule Use Case Diagram

Figure 6: <System> Notify reading schedule use case diagram

Use Case Specification

USE CASE – ARB06			
Use Case No.	ARB06	Use Case Version	2.0
Use Case Name	Notify reading schedule		
Author	Trinh Van Vu		
Date	30/05/2014	Priority	High
Actor: <ul style="list-style-type: none">- System			
Summary: <ul style="list-style-type: none">- System can notify reading schedule to user when user login			
Goal: <ul style="list-style-type: none">- Notify user when reading time start and end.			
Triggers: <ul style="list-style-type: none">- User log in the system			
Preconditions: <ul style="list-style-type: none">- User bought book- User configured schedule- User log in the system			
Post Conditions: <ul style="list-style-type: none">- Success: Notify user reading time at start reading time and end reading time.- Fail: Log error to administrator.			
Main Success Scenario:			
Step	Actor Action	System Response	
1	Server checks user reading schedule.	Send response when the time reach start and end time [Alternative 1][Exception 1]	
Alternative Scenario:			
No	Actor Action	System Response	
1	Time is out of start time and end time.	Show notification “Bạn đã hết giờ đọc sách”	
Exceptions:			
No	Actor Action	System Response	
1	Cannot send notify from server	Log error message to administrator	
Relationships: N/A			
Business Rules:			

- System compares current time and end time in schedule which is configured by user. (from server)
 - + Current time is more than end time in schedule: Response reading time at start reading time and end reading time which is configured by user.
 - + Current time is less than end time in schedule: Response to user is time's out of start time and end time
- User can receive notifications at the time when system sends notification.

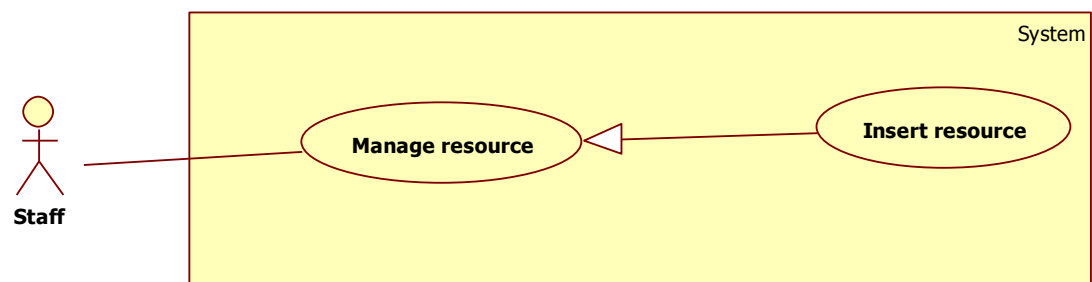

Figure 10: <Staff> Insert resource use case diagram

Use Case Specification

USE CASE – ARB10			
Use Case No.	ARB10	Use Case Version	1.0
Use Case Name	Insert resource		
Author	Pham Nguyen Bich Hien		
Date	31/05/2014	Priority	High
Actor: <ul style="list-style-type: none">- Staff.			
Summary: <ul style="list-style-type: none">- This use case allows Staff to insert new (video, ebook, audio).			
Goal: <ul style="list-style-type: none">- Add a new video, ebook, audio.			

Triggers:

- Staff want to add more resource to database.

Preconditions:

- Book didn't contain in system.
- Staff must login to system with role staff.
- Staff choose add book function.

Post Conditions:

- **Success:** A new video, ebook or sound will be added
- **Fail:** No resource will be added. Show error message.

Main Success Scenario:

Step	Actor Action	System Response
1	Staff choose add book function	System will show "Thêm Sách" which includes: <ul style="list-style-type: none"> - Video - Ebook - Audio
2	Staff choose "Video" [Alternative 1], [Alternative 2], [Alternative 3]	Navigate to add book pages.

Alternative Scenario:

- Alternative 1: "Video"

Step	Actor Action	System Response
1	Click "Video"	System wil show "Thêm video" page <ul style="list-style-type: none"> - Tên sách: textbox, min length: 1, max length: 100, required - Thẻ loại: drop down list, raw source from database – Category table, required. - Vuforia texture: Upload controller. - JS Toolkit texture: Upload controller. - Tác giả: textbox, min length: 1, max length: 100, required - Nhà xuất bản: textbox, min length: 1, max length: 100, required - Số tập: spinner, min length: 1, max length: 4, range: [1, 9999], required. - Giá tiền/ tập: textbox, regular expression: "\d*[.]?[d+]", min length: 5, max length: 100, required. - Mô tả: text field, required. - Video stream URL: textbox, min length: 6, max length: 500, required.

		<ul style="list-style-type: none"> - Thêm link: button [Alternative 1.1] - Thêm sách: button
2	Input fields. [Exception 1, 2, 3, 4, 5, 6, 7, 8, 9, 10]	
3	Click on “Thêm sách” button	Book will be added to database and show: “Bạn đã thêm sách thành công”
○ Alternative 1.1:		
Step	Actor Action	System Response
1	Click “Thêm link”	One more text box show: Video stream URL: textbox, min length: 6, max length: 500.
- Alternative 2: “Ebook”		
Step	Actor Action	System Response
1	Click “Ebook”	System wil show “Thêm ebook” page <ul style="list-style-type: none"> - Tên sách: textbox, min length: 1, max length: 100, required - Thể loại: drop down list, raw source from database – Category table, required. - Vuforia texture: Upload controller. - JS Toolkit texture: Upload controller. - Tác giả: textbox, min length: 1, max length: 100, required - - Nhà xuất bản: textbox, min length: 1, max length: 100, required - Số tập: spinner, min length: 1, max length: 4, range: [1, 9999], required. - Giá tiền/ tập: textbox, regular expression: “\d*[.]?[d+”, min length: 5, max length: 100, required. - Mô tả: text field, required. - Ebook contain URL: textbox, min length: 6, max length: 500, required.
2	Input fields. [Exception 1, 2, 3, 4, 5, 6, 7, 8, 9, 10]	
3	Click on “Thêm sách” button	Book will be added to database and show: “Bạn đã them sách thành công”
- Alternative 3: “Audio”		
Step	Actor Action	System Response
1	Click “Audio”	System wil show “Thêm audio” page <ul style="list-style-type: none"> - Tên sách: textbox, min length: 1,

		<p>max length: 100, required</p> <ul style="list-style-type: none"> - Thẻ loại: drop down list, raw source from database – Category table, required. - Vuforia texture: Upload controller. - JS Toolkit texture: Upload controller. - Tác giả: textbox, min length: 1, max length: 100, required - - Nhà xuất bản: textbox, min length: 1, max length: 100, required - Số tập: spinner, min length: 1, max length: 4, range: [1, 9999], required. - Giá tiền/ tập: textbox, regular expression: “\d*[.]?[d+”, min length: 5, max length: 100, required. - Mô tả: text field, required. - Audio stream URL: textbox, min length: 6, max length: 500, required. - Thêm link: button [Alternative 3.1]
2	Input fields. [Exception 1, 2, 3, 4, 5, 6, 7, 8, 9, 10]	
3	Click on “Thêm sách” button	Book will be added to database and show: “Bạn đã thêm sách thành công”
○ Alternative 3.1:		
Step	Actor Action	System Response
1	Click “Thêm link”	One more text box show: Audio stream URL: textbox, min length: 6, max length: 500.
Exceptions:		
No	Actor Action	System Response
1	Length of book name is not in range.	Show error message: “Độ dài tên sách phải từ 6-30 ký tự!”
2	Category is not specified	Show error message: “Hãy chọn thẻ loại!”
3	Vuforia texture is not specified	Show error message: “Vui lòng chọn ảnh nhận diện mobile!”
4	JSToolkit texture is not specified	Show error message: “Vui lòng chọn ảnh nhận diện cho webcam!”
5	Length of author is not in range.	Show error message: “Độ dài tên tác giả phải từ 6-30 ký tự!”
